Light is freedom of design

Flexessories® provide a modular system for LINEARlight Flex®

Cover a wide range of applications with Flexessories®

Four different track systems (Slim Track, Handrail Track, Wide Track and Edge Lighting Track) and further Flexessories® allow you to create complete lighting solutions for a great variety of applications.

Make your flexible LED solution complete

Thanks to a modular system combining LINEARlight Flex® LED strips and matching Flexessories®, LED drivers and light management components, the complete OSRAM portfolio for flexible LED solutions offers maximum freedom of design.

A complete and matching system

LED drivers

LED strips

Flexessories®

Easy installation

1. Measure the distance and mark the fixing positions for the mounting brackets (recommendation: one mounting bracket every 0.5 to 0.8 m).
2. Fix the mounting brackets at the marked positions with a screwdriver.
3. Clean the surface of the track with a multi-purpose cleaner.
4. Use a personal earthing system to avoid damaging effects due to electrostatic discharge.
5. Cut the LED strip to the required length.
6. Connect the LED strip with a dedicated OSRAM connection system (or soldering wire). Stick the strip into the selected track system. Count not apply pressure on the LEDs!
7. Take the cover and gently press it down onto the track.
8. Click the track with the cover into the mounting brackets.
9. Perform the final operating test.

Overview of mounting methods

Glass lighting

The Edge Lighting Track allows you to implement amazing glass applications with uniquely lit features and bespoke designs, for example in galleries and museums. Create elegant glass solutions with flexible LED modules.

Edge Lighting Track

— Illumination of the edges of glass or acrylic materials
— Robust aluminum track, corrosion-resistant thanks to anodization
— Quick and easy installation

Glass applications with uniquely lit features and bespoke designs

Special effects in wall washing applications

The Slim Lens Track and the corresponding lens cover are perfect for extraordinary wall washing applications. Let large surfaces such as walls and ceilings appear in an entirely new light with special mood and effect lighting created with OSRAM LED strips and Flexessories®.

Slim Lens Track

— Smallest lighting solution for wall washing effects
— Ideal for minimalist integration due to compact design
— Different beam angles (10°, 30°, 60° and 90°) with dedicated track and lens cover, simple adjustment by changing the position of the metal insert
— Robust aluminum track, corrosion-resistant thanks to anodization
— Quick and easy installation
— Suitable cover for homogeneous light distribution

Slim and wide solution for flexible design

Slim Track 45° and Wide Track 30°

— For quick and easy installation into handrails with dedicated mounting brackets
— Suitable illumination of stairs and walkways with hidden light source
— Robust aluminum track, corrosion-resistant thanks to anodization
— Suitable cover for homogeneous light distribution

Overview of mounting methods

Cove lighting

When it comes to general illumination in confined spaces such as coves, the Slim Track is your best choice. Create optimal interior lighting, also in drywall ceilings – with dramatic effects as well as bright and uniform light.

Cove lighting

Meeting design as well as functional requirements, the Wide Track fits perfectly into suspended ceilings and adds atmosphere to any space. Use it in an energy-efficient primary lighting solution in indoor areas.

Wide Track

— Perfect balance between design and functional lighting
— Suitable for energy-efficient primary lighting as two LED strips can be installed inside the track (for more information, contact the OSRAM service support)
— Robust aluminum track, corrosion-resistant thanks to anodization
— Quick and easy installation
— Suitable covers for homogeneous light distribution

Shelf, furniture and closet lighting

In order to highlight shelves, furniture, closets or similar spaces, two LEDs can be selected, the Slim Track 45° and the Wide Track 30°. Make use of special beam angles to provide subtle accentulation in many small and larger spaces.

Cover a wide range of applications with Flexessories®

Four different track systems (Slim Track, Handrail Track, Wide Track and Edge Lighting Track) and further Flexessories® allow you to create complete lighting solutions for a great variety of applications.

Recessed lighting
Meeting design as well as functional requirements, the Wide Track fits perfectly into suspended ceilings and adds atmosphere to any space. Use it in an energy-efficient primary lighting solution in indoor areas.

Wide Track
- Perfect balance between design and functional lighting
- Suitable for energy-efficient primary lighting as two LED strips can be installed inside the track (for more information, contact the OSRAM service support)
- Robust aluminum track, corrosion-resistant thanks to anodization
- Quick and easy installation
- Suitable covers for homogeneous light distribution

Screw on to anodization

Suitable cover for homogeneous light distribution

Shelf, furniture and closet lighting
In order to highlight shelves, furniture, closets or similar spaces, two tracks can be selected: the Slim Track 45° and the Wide Track 30°. Make use of special beam angles to provide subtle accentuation in many small and larger spaces.

Stainless steel: Edge Lighting Track
- Suitable for energy-efficient primary lighting as two LED strips can be installed inside the track (for more information, contact the OSRAM service support)
- Ideal for minimalistic integration due to compact design
- Different beam angles (10°, 30°, 60° and 90°) with dedicated track and lens cover, simple adjustment by changing the position of the metal insert
- Robust aluminum track, corrosion-resistant thanks to anodization
- Quick and easy installation
- Suitable cover for homogeneous light distribution
